# JAMES SCARBERRY

Software Engineer · .NET / C# / Azure / Cloud Infrastructure
Binger, OK 73009 · +1-224-856-2025 · jamesscarberry@my.uopeople.edu · U.S. Citizen

## SUMMARY

Software engineer with over 3 years building and shipping production .NET/C# systems across Azure, Blazor, and SQL Server. Track record of high-impact custom software — large-scale data migrations, multi-platform integrations, and self-hosted Linux infrastructure — that cuts costs and closes vendor gaps. Team lead experienced in mentoring developers and delivering quality features under tight timelines.

## EXPERIENCE

**Lead Software Developer** — Ferrum Technology Services (Remote) **Jan 2023 – Present**

- Migrated 130,000+ tickets between PSA platforms — including time entries, attachments, and contact data — eliminating external consulting and migration fees.
- Built a custom .NET API to a niche client spec in a few billable hours, saving the client over $10,000.
- Designed and shipped a Blazor/C# camera-streaming and monitoring application on Linux (Ubuntu, MediaMTX) to close gaps left by existing commercial vendors.
- Developed high-performance Blazor applications integrating multiple systems for automated invoice generation, reducing operating costs.
- Built hourly Azure WebJobs automating CDR data migrations between disparate systems.
- Delivered integrations across Twilio, Telnyx, MoeGo, 3CX, HaloPSA, ConnectWise, Pax8, and Vacation Tracker.
- Created a domain-specific language and custom compiler to streamline O365 and multi-platform user administration.
- Supervised and mentored developers in Azure and .NET; established processes for feature delivery and rapid bug-fix turnaround.
- Gathered requirements directly from clients and automated business processes to solve operational problems.

**Technical Support Engineer** — Ferrum Technology Services (Remote) **Feb 2021 – Dec 2022**

- Provided remote IT support: networking and firewall configuration, Active Directory and O365 user management, script modification, and hardware support.

**Independent IT Consultant** — On-Demand IT Support (Remote) **2011 – 2025**

- Delivered hardware, software, networking, and cybersecurity support and consultation for a wide range of clients.

## TECHNICAL SKILLS

**Languages:** C#, Python, Java, JavaScript, SQL, HTML/CSS

**.NET Stack:** .NET Core (6/8/10) & Framework, Blazor/Razor, ASP.NET Web APIs, Entity Framework Core, WinForms, WebJobs, Console apps

**Cloud & Data:** Azure, SQL Server, PostgreSQL, MySQL, MongoDB

**DevOps & Infrastructure:** Linux (Ubuntu, Fedora, CentOS, Kali), Windows Server, Git/GitHub, PowerShell, networking, Postman

**Other:** AI-assisted development, compiler development, team leadership & mentoring; Bilingual (English / Spanish)

## EDUCATION

**M.S., Information Technology** — University of the People (USA) — *Expected Dec 2026*

**Engineer of Computer Systems (B.S. equivalent, 5-year program)** — Universidad Técnica del Norte — 2022 — *Valedictorian, Faculty of Applied Sciences Engineering*

## SELECTED PROJECTS & RECOGNITION

- **Compiler & Domain-Specific Language (Engineering Thesis, 2022):** Built a multimedia programming language and LALR compiler from scratch that auto-detects and corrects errors during compilation, compiles to C#, and executes — designed to teach programming to high-school students. 85.7% of student testers recommended it as a learning tool.
- **Microsoft Build:** Attended in person (2025); attended virtually (2023, 2024).
